EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Mark Stallion on September 14, 2006.

The application has been amended as follows:

Cancel non-elected claims 25-32 without prejudice.

The following is an examiner's statement of reasons for allowance: The claimed system for producing portions of ground meat having a predetermined target is believed to be in condition for allowance and is being passed onto issue. The prior art of record does not anticipate nor render obvious with proper teaching(s) the claimed invention. The claimed invention is directed to a system comprising a pump assembly capable of extruding a stream of ground meat, a conveyor capable of transporting the stream of ground meat from the pump assembly, a portioning mechanism capable of separating the stream of ground meat into a plurality of portions, a weighing mechanism capable of weighing each portion of the plurality of portions and at least one filling mechanism that provides an additional amount of ground meat to each portion of the plurality of portions so that each portion of the plurality of portions can substantially attain the predetermined target weight. The prior art rejection Kobussen et al (US Patent 6,245,369) does not teach a portioning mechanism capable of separating the stream of

ground meat into a plurality of portions and at least one filling mechanism that provides an additional amount of ground meat to each portion of the plurality of portions so that each portion can substantially obtain the predetermined target weight.
